

*a new era in cancer drug development realized*

## **Database Developer**

### **Our Company**

Presage Biosciences, Inc. is an innovative oncology company with an entirely novel platform for assessing new drugs and combinations to treat solid tumors. Our proprietary technology platform, CIVO®, simultaneously analyzes multiple cancer drug candidates and drug combinations within a single living tumor.

Presage is a growing, privately held company led by an experienced management team and is headquartered in the vibrant South Lake Union area of Seattle, WA.

### **Key Responsibilities**

- Design, develop, deploy, maintain, support, and extend database applications
- Create scripts for data integration, data maintenance, or bug fixes
- Develop proactive working relationships with employees in determining business and functional requirements
- Identify solutions to resolve the data needs of employees
- Design user interfaces
- Prototype new applications to refine requirements
- Provide technical consulting and respond to error reports, problems, or questions
- Provide data integration solutions for imaging processes
- Review, analyze, and document data and workflow processes
- Assist with administrative maintenance of relational database including backup/recovery, schedule jobs, problem diagnosis, and performance fine tuning
- Design and implement data models
- Assist with database capacity issues, replication, and other distributed data issues
- Manage schedule for expected resolution of changes
- Build consensus on priorities for creating potential solutions and resolving problems
- Develop enterprise strategy for data management
- Define and implement software development life cycle
- Automate diagnostics of deployed systems
- Research third-party solutions as an alternative to development
- Support data analysis efforts by other employees
- General information technology duties as necessary
- Other duties as requested

### **Qualifications**

- A Bachelor's Degree in Computer Science or Informatics, or equivalent experience
- Three years of experience developing relational database applications
- Two years of experience developing front and back ends of web-based applications
- Experience providing software support and advocating for users
- Experience deploying software and data fixes

- Demonstrated ability to implement a software development life cycle
- Excellent written and verbal communication skills
- Ability to learn and model complex domain knowledge
- Ability to self-manage and prioritize assigned tasks
- Experience negotiating requirements and priorities with users and stakeholders
- Experience with some or all of the following technologies: C#, ASP.NET, MVC, SQL Server, Transact SQL, HTML5/CSS, Active Directory, jQuery, JavaScript, IIS, Entity Framework, Windows Server, Git, JIRA, Visual Studio, SSDT, NuGet
- Experience with most of the following concepts: object-oriented programming, MVC, extract/transform/load processes, application logging, exception handling, audit tracking, attribution, issue tracking, version control, release management

### **Work Environment**

In-office

### **Join Us!**
